THERMOLITE™ SE

THERMOLITE™ WE

**PERFECT FOR A
VARIETY OF
ARCHITECTURAL
GLAZING
APPLICATIONS!**

NEW! **FABRICATED THERMOLITE™ GLAZING PANELS**

High-Performance Glazing Products

In addition to our standard flat Thermolite panel, Laminators now offers fabricated options to provide additional R-Value, new aesthetics and to create hairline joints between panels. Thermolite Glazing Panels are

designed to easily fit into any standard or custom glazing system. With building and energy efficiency codes becoming even more stringent, these panels can be a smart solution for your next project.

Thermolite™ U-MAX

A 7-ply, rabbet edge panel designed to provide increased insulation on the interior face of the panel.

- Increases R-Value by 100-200% (over standard 1" infill panels)
- Up to 3-1/2" Overall Panel Thickness

Thermolite™ SE

To provide new aesthetics with the ability to adjust the reveal created between the face of the mullion and the face of the panel.

- 2-4 Stepped Edges
- Fits into 1" to 2-1/2" Glazing Pocket

Thermolite™ WE

Edge treatment allowing for metal-to-metal butt-glazed joints to create hairline joints.

- 1-4 Wrapped/Panned Edges
- Up to 2-1/2" Panel Thickness
