

HPD UNIQUE IDENTIFIER: 27144

CLASSIFICATION: 07 42 13.23 Metal Composite Material Wall Panels

PRODUCT DESCRIPTION: Glaze-Lite is a metal composite material (MCM) panel that consists of a thermoplastic core typically bonded to a texture/color finished sheet of aluminum on each face. Panels are intended for use in glazing and storefront applications but not for use in Laminators Inc. installation systems. Glaze-Lite glazing insert panels provide a decorative alternative to glass installed in storefronts and doors when there is no R-value requirement. They're easy to handle and install into various glazing and extrusion systems.

## Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.2, available on the HPDC website at: [www.hpdc-collaborative.org/hpd-2-2-standard](http://www.hpdc-collaborative.org/hpd-2-2-standard)
