

## Shop Drawings Criteria Checklist

- Obtain wind load data from architectural notes or structural drawings
  - Note: fastener spacing and reinforcing requirements may be affected by higher wind loads
- Determine the applicable Laminators system details
  - Reference [CAD Drawings Reference Matrix](#)
  - Note the requirements for NFPA 285 and determine if detailing and restrictions apply
- Include Laminators system elevations, especially for BDV systems to show sub-framing configuration
  - Note: Some details are specific to horizontal or vertical orientation and are not interchangeable
- Make any custom modifications to the CAD files, based on project-specific conditions
  - Contact Laminators Technical Services with any questions regarding supported solutions or compliance
- Include Omega CI details if there is OCI on the job
