

Recycled Content Information

Architectural Composite Panels

For 60 years, Laminators Incorporated has manufactured high quality composite panels for use in commercial construction as well as the sign-making industries. Our products are manufactured in Hatfield, PA and are used throughout the US and Canada. We are committed to manufacturing and providing environmentally friendly and sustainable products to our customers.

Laminators' architectural panels consist of the following recycled aluminum content and may help projects earn points in the [Leadership in Energy and Environmental Design \(LEED\) rating system](#):

Product	Total Pre-Consumer / Post-Industrial	Total Post-Consumer	Total Recycled Content
Omega-Lite®	28%	0%	28%
Thermolite™ 1"	24%	0%	24%
InfernoShield™	9%	0%	9%
Omega Foam-Ply® 1"	6%	0%	6%
Omega CI®	9%	0%	9%

Note: While similar to Omega-Lite, the recycled content of Glaze-Lite™ and Omega-Flex™ may vary based on customer options and can be provided upon request.
